

# TORI HAWKINS

## Candidate Briefing Document

**Role Alignment:** Data Engineering | Advanced Analytics

**Location:** Greater St. Louis (Remote)

**Experience:** 15+ Years

**Industry Expertise:** Healthcare Analytics, Fraud Detection, Regulatory Reporting

## Candidate Overview

Tori Hawkins is a senior data engineering professional with over 15 years of experience designing and operating enterprise analytics platforms in highly regulated healthcare environments. Her expertise spans distributed data pipelines, analytics platform modernization, and machine learning infrastructure enablement supporting fraud detection, compliance reporting, and investigative analytics. She has a strong track record of transforming complex, heterogeneous enterprise data ecosystems into scalable analytics platforms that support both operational reporting and advanced analytics initiatives. Her work combines hands-on engineering with platform reliability improvements, data discovery leadership, and analytics enablement for cross-functional teams.

## Strategic Value to the Organization

### Enterprise Analytics Platform Engineering

Extensive experience designing distributed ETL/ELT pipelines that integrate large-scale healthcare datasets across multiple enterprise systems, enabling reliable analytics and investigative workflows.

### Data Platform Modernization

Demonstrated ability to modernize legacy reporting systems and operational pipelines using distributed compute frameworks and scalable analytics architectures.

### Machine Learning Enablement

Supports data science teams by delivering model-ready datasets, feature pipelines, and experiment tracking frameworks that enable machine learning experimentation and analytics innovation.

### Operational Reliability & Observability

Implements monitoring frameworks and telemetry dashboards that improve visibility into pipeline health, operational incidents, and platform reliability across distributed data environments.

## Current Role Overview

### The Cigna Group | Evernorth | Express Scripts

Analytics Advisor - Data Infrastructure (Special Investigations Unit)

Responsible for engineering and supporting analytics infrastructure used for fraud detection, compliance reporting, and investigative analytics. Key contributions include:

- Designing distributed ETL/ELT pipelines integrating healthcare claims data across enterprise systems
- Modernizing legacy reporting pipelines using distributed compute frameworks
- Developing observability dashboards to monitor analytics pipeline health
- Delivering self-service analytics dashboards reducing manual investigative reporting by 25%
- Enabling machine learning experimentation through feature pipelines and model-ready datasets

## Technology Ecosystem

**Data Engineering:** Python | SQL | Spark | Databricks | Kafka | ETL / ELT

**Data Platforms:** Teradata | Oracle | DB2 | SQL Server | Data Lakes | Data Lakes/ Warehouses

**DevOps:** Git | CI/CD | Jenkins

**APIs & Integration:** Databricks API | Azure APIs | MLflow API | Tableau API

**Analytics & Machine Learning:** MLflow | Azure ML | Feature Engineering | Predictive Modeling

**Cloud & Infrastructure:** AWS | Azure | Kubernetes | Docker

# TORI HAWKINS

## Candidate Briefing Document

**Role Alignment:** Data Engineering | Advanced Analytics

**Location:** Greater St. Louis (Remote)

**Experience:** 15+ Years

**Industry Expertise:** Healthcare Analytics, Fraud Detection, Regulatory Reporting

### Technical Leadership Profile

Tori combines strong technical depth with the ability to collaborate across engineering, analytics, and business teams. Key strengths include:

- Distributed data platform architecture
- Enterprise ETL/ELT pipeline design
- Data discovery and analytics enablement
- Machine learning infrastructure support
- Data governance in regulated environments

### Ideal Role Alignment

Based on experience and skill set, the candidate shows strong potential for growth into roles such as:

- Data Analytics Manager
- Principal Data Engineer
- Analytics Platform Architect
- Analytics Infrastructure Engineer
- Machine Learning Data Engineer

### Candidate Summary Recommendation

Tori Hawkins is a strong candidate for organizations seeking an experienced data engineer capable of building scalable analytics platforms within complex enterprise environments. Her combination of distributed data engineering experience, healthcare analytics domain expertise, and support for machine learning workflows positions him well to contribute to modern analytics and AI-driven data initiatives.
